Anyone Can Drive Traffic When Shown How!

Detailed Mentoring for Free, Use it On Any Project!

Simple, Low Cost Traffic Driving Ways Are Taught!

(Read this for keen marketing and traffic insights!)

Part 1 - Google and Bing Marketing

Here is some brief mentoring in search engines! We know how to submit links to search engines for no cost, but how about the paid ads who get all the tops spots? I will be talking about these in coming sections. Some Internet marketers are making \$300-\$500K annually, and some even more, even up to 1 million+ a year. I have taught on this before and I call it the **Water Wheel Technique**. It is where you can make \$1000 a day and use \$200 a day to keep you making \$1000 a day, effectively earning you \$800 in profit a day. Or, \$5000 a day, using \$1000 a day to keep the \$5000 coming, thereby earning you \$4000 a day profit. This is not done suddenly. But pay per click is the main way to do this. (PPC)

You might have to bid \$1.25 or more per word to get near the top of searches, and that is quite expensive daily, but, who cares if it helps you make \$1000 or \$2000 that day. It doesn't really matter then how much you pay to get the click if it has a massive payday for you. Who cares, if, you are in the income flow mentioned? I will discuss this more next time. The goal is, to become the "who cares about cost" person with the huge daily budget.

Part 2 - More on High Volume Marketing in Search Engines!

Last time, I talked about high income earners online, those who earn up to and over a million per year. I guess if you have trouble making \$200 a month, then hearing you could ever achieve an extraordinary online income such as **\$200K or up to and over 1 million in a year** is just pipe dreams. Or, are they? Maybe you have not opened your mind yet to the pathway to do it. Maybe a mentor has never shown you the way.

Using Google or Bing with PPC, (pay per click) is how they do it, among other ways too. Bing operates the same way as Google. There are even smaller less expensive search engines you can use. It is as simple as going to their keywords tool and entering one keyword phrase, and they supply you with software creating dozens, even hundreds of synonymous phrases, giving you a large stack of key search phrases. It takes about a minute. Anyone can do it. It takes no great skill, a 5th grader could do it. Next, you are asked to insert a credit card, and choose a daily budget to spend, and then bid what you would pay per keyword phrase. It even shows you how you rank on the search page among others bidding with your choice.

It is all so simple. But here is the kicker. The average online project does not create the cash flow to sustain such a daily budget. Who can commit to \$100 a day, or even \$20 a day? \$20 a day is \$600 monthly. Our minds cannot think like that. We weigh the risk. How can one jump into the mix and be sure of safety? If you earn \$500 a day, you can afford \$100 a day, right?? Most projects are not set up for high cash yield daily. Most of your current projects do not go there, but are more based on hopeful long-term benefit-ting. How about the short term, and the long term? Most high cash yield projects require that you put up hundreds or thousands of dollars up front and risk much to see if this works for you. But there are projects out there to help you get there more safely by thinking outside the box. There are projects that have the risk reduced and hardly existing at all. This gives power to the little guy or gal. And to think there is one to begin for free! Go to Part 3 now.

Part 3 - A Project You Can Follow Me In, and Start for Free Today!

There is a firm that answers many problems that I have addressed in this writing. It is newer, but has already gotten through the first year and is now thriving and exploding for the 2nd year. But it is still early. Although you can begin for free, (and get paid \$25 as a free member) you can earn up to \$4000 checks, and every amount in between. Here is the back-end high pricing of products that gets you enough cash flow to use PPC as I have been teaching about, while being free or very low cost on the front end, with the ease and safety of gradual and seamless upgrades. This one is safe, and lets you upgrade at your own leisure, only paying the difference

when you upgrade. The upgrades are smooth and seamless. You can upgrade from profits. They teach you what you need to know to get to the high levels. They show you how to drive traffic very inexpensively, even free. It is all set up with methods of traffic creation before you ever get to the PPC ads that I teach about and will show you. You will be in my downline and you will be my personal referral and I will show you exactly how I am doing it. When you are ready, and at the level to afford a healthy daily budget, I will show you how the PPC works, and you can become a \$500-\$1000 a day marketer too. This one makes sense. I will allow you to follow my progress and see my techniques which anyone can do. You get paid giving away free websites, and you get much free training on driving traffic in the free back office. Much money can be made here. You risk nothing to sign in and look it over, but you can glean and collect great mentoring information. This is called, **Best Easy Work**. Look this one over, it costs you nothing to do that.

Your free sign up, even if you pay nothing, gets you on my mailing list for mentoring helps on traffic and marketing.

God bless,

Greg Nichols
